SUMMARY

Aspiring DevOps and Cloud Engineer with practical experience in Linux server management, Docker-based deployments, Git/GitHub workflows, and web hosting fundamentals. Currently developing skills in CI/CD pipelines, cloud infrastructure, automation, and backend deployment practices.

TECHNICAL SKILLS

Programming Languages

- Python (Basic)
- Bash/Shell Scripting
- JavaScript (Basic)
- HTML/CSS

Tools

- Docker
- Git & GitHub
- GitHub Actions
- Nginx
- AWS EC2
- Linux/Ubuntu
- SSH

PROJECTS

Web Application Deployment

- Containerized and deployed web application using Docker on Ubuntu VPS
- Configured Nginx reverse proxy and Gunicorn for production deployment
- Managed domain configuration, server environment, and application hosting
- Implemented backend API integration and deployment workflow management

Technologies: Docker, Python, Nginx, Gunicorn, Ubuntu, VPS, GitHub

ADDITIONAL TECHNICAL EXPERIENCE

- Managed Ubuntu/Linux server environments and user permissions
- Configured SSH access, firewall rules, and networking settings for remote server management
- Worked with Docker containers for application deployment and environment isolation
- Setup Nginx reverse proxy and domain configuration for hosted applications
- Used Git and GitHub for version control and project management
- Explored CI/CD workflows and automated deployment concepts using GitHub Actions
- Troubleshoot server, networking, and deployment-related issues in VPS environments

EDUCATION

Presidency University Bangladesh

Bachelor of Science in Computer Science and Engineering

Expected Graduation: 2028

Dhaka, Bangladesh
